Experiment 5

Aim

To design and build a complete suite of Reports in Zoho Creator for the Library Book Issue Request Form application, demonstrating the correct usage of all nine Report Types available in Zoho Creator.

Reports Used

Report Type	Report Name
List View	All_Issue_Requests_List
Spreadsheet View	Issue_Requests_Spreadsheet
Kanban View	Issue_Status_Kanban
Calendar View	Due_Date_Calendar
Map View	Member_Hostel_Map
Timeline View	Issue_Activity_Timeline
Pivot Table	Category_By_MemberType_Pivot
Chart View	Category_Popularity_Chart
Summary View	Member_Wise_Summary

Report Configuration Details

All_Issue_Requests_List (List View)

- Default landing report for the librarian, showing every issue request in a flat, searchable list.
- Includes a search bar and column-level filters for Book Category, Member Type, and Issue Status.

Issue_Requests_Spreadsheet (Spreadsheet View)

- Used daily by counter staff to update issue status and due dates in bulk during peak hours.
- Only Issue Status, Due Date, and Books Returned columns are editable; all other columns are read-only.

Issue_Status_Kanban (Kanban View)

- Used by the librarian to visually track requests from Requested to Returned (columns: Requested / Approved / Issued / Returned / Overdue).
- Staff drag a request card across columns, updating the underlying Status field automatically.

Due_Date_Calendar (Calendar View)

- Used by the librarian to see how many books are due on a given day and flag overdue ones early.
- Clicking a date drills down into the list of books due for return that day.

Member_Hostel_Map (Map View)

- Used by the delivery assistant to plan an efficient route for home-delivery requests across hostel blocks.
- Helps group nearby blocks into a single trip.

Issue_Activity_Timeline (Timeline View)

- Used by the librarian to monitor borrowing trends across the semester, including exam-time spikes.
- Helps plan additional copies or extended library hours during high-demand periods.

Category_By_MemberType_Pivot (Pivot Table)

- Rows: Book Category; Columns: Member Type; Values: Count of Issue Requests.
- Shows which subject categories are most popular with students versus faculty.

Category_Popularity_Chart (Chart View)

- Bar chart: X-axis Book Category, Y-axis Count of Issue Requests.
- Used in library committee meetings; directly informs the annual book procurement budget.

Member_Wise_Summary (Summary View)

- Grouped by Member Name; summary columns: Count of Books Borrowed and Sum of Fine Amount.
- Totals feed into fine-collection follow-ups and membership renewal decisions.

Validation & Configuration Rules

- List View: default sort by Request Submitted On, descending, so the most recent requests appear first.
- Spreadsheet View: edit permission restricted to the Library Counter Staff role; all other fields locked.
- Kanban View: card movement between columns updates the Status field with a timestamp.
- Calendar View: dates in the past are highlighted in a different colour to flag overdue books.
- Map View: Hostel/Residential Address must be geocode-enabled for accurate pin placement.
- Timeline View: data refreshes daily to reflect the latest borrowing trend.
- Pivot Table: blank cells are displayed as zero rather than left empty.
- Chart View: chart auto-refreshes whenever a new issue request is submitted.
- Summary View: members with zero pending fines are still listed, with a fine amount of zero.

Workflow Summary

- Step 1: Members submit book issue requests through the Book_Issue_Request_Form.
- Step 2: The librarian monitors incoming requests using the All_Issue_Requests_List and the Issue_Activity_Timeline.
- Step 3: Counter staff track progress visually using the Issue_Status_Kanban.
- Step 4: The librarian uses the Due_Date_Calendar to flag books due for return and follow up on overdue ones.
- Step 5: The delivery assistant uses the Member_Hostel_Map to plan the day's home-delivery route.
- Step 6: The library committee reviews the Category_By_MemberType_Pivot and Category_Popularity_Chart to guide procurement.
- Step 7: Daily, counter staff update the Issue_Requests_Spreadsheet in bulk, while the librarian uses the Member_Wise_Summary to follow up on outstanding fines.

Result

A suite of Reports in Zoho Creator for the Library Book Issue Request Form was created using all nine Report Types.
